

Troubleshooting Dialogue System

There are compatibility issues.

Operating System (OS)	Game Engine Version	Plugin Version	Working or not?
Windows 7 (at home)	4.10.4	1.5	Working
Windows 7 (at school)	4.10.4	Did not get that far.	Administrative permissions did not allow the engine to be installed.
Windows 7 (at school)	4.9	1.5 or 1.5.1	Not tested yet. Might work.
Windows 7 (at school)	4.8	1.5	Not tested yet. Don't expect it to work but every stone must be turned over
Windows 7 (at school)	4.11	1.6	Not tested yet. Might work. The creator seems to think that 1.6 fixed the problem that we were having in the lab.
Mac OS X (10.10) At school	4.10.4	1.5.1	no
Mac OS X (10.10) At school	4.10.4	1.6	no
Mac OS X (10.10) At school	4.10.4	1.5	Don't think so – need to retest to be sure
Mac OS X (10.10) At school	4.9	1.5 or 1.5.1	Not tested yet. Might work.
Mac OS X (10.10) At school	4.8	1.5	Not tested yet. Might work.
Mac OS X (10.10) At school	4.10.4	1.5.1 Recompiled with XCode version 7	Not tested yet. Might work.
Mac OS X (10.10) At school	4.11		No OS X (10.10) does not install and launch version 4.11 of the engine.
